WebQuest-Solids, Liquids, and Gases

Matter usually exists in one of three states or phases: solid, liquid, or gas.

The chair you are sitting on is a solid, the water you drink is liquid, and the air you breathe is a gas. Using the following web address, learn more about matter.

http://www.ducksters.com/science/solids_liquids_gases.php

1. Matter is made up of tiny objects called?

2. List the three states or phases of matter?

3. When matter changes state what does change?

preview

4. When matter changes state what does change?

5. What has to be added to matter to make it change state?

6. What is water called in its solid state? What is water called when it's a gas?
